Equipment handbook

An example document for the BuildrLab RAG Field Guide

Returns and refunds

Unopened equipment can be returned within 30 days of delivery. A receipt or order number is required. Opened equipment is eligible only if it is faulty. Refunds use the original payment method and take 5 to 10 business days after inspection.

Exceptions

Custom engraved equipment cannot be returned unless faulty. Subscription renewals are covered by a separate cancellation policy. Contact support before shipping a battery because transport restrictions apply.

Delivery

Standard delivery takes 3 to 5 business days. Express delivery takes 1 to 2 business days. Delivery estimates start after dispatch, not when an order is placed. A tracking email is sent when the package leaves the warehouse.

Warranty

The Trail 200 and Trail 400 have a two-year limited warranty against manufacturing defects. Proof of purchase is required. Accidental damage, water immersion and ordinary wear are excluded. Replacement parts retain the original warranty end date.

Read the table as a table

An example document for the BuildrLab RAG Field Guide

A value needs its row label, column heading, units and footnotes.

Model	Runtime*	Weight	Resistance
Trail 200	8 hours	310 grams	IP54
Trail 400	14 hours	470 grams	IP65

* Runtime at 50% brightness and room temperature.
Cold weather and maximum brightness reduce runtime.
IP65 does not mean the device is safe for immersion.

A useful retrieval unit

Trail 400 | Battery runtime: 14 hours | Weight: 470 grams | IP65.
Runtime measured at 50% brightness and room temperature.
Keep the footnote with the row when it changes the meaning.

A misleading fragment

"14 hours | 470 grams | IP65" - which product, under what conditions?
